

R/C MERT E-BOARD AGENDA: February 28, 2013

Operations:

- On Sunday, old Eboard's privileges on EMScharts will be taken away.
- All of Eboard was invited to dropbox.
- Conference went well, those who participated learned a lot.
- BP Screenings in the GAC were successful.
- On all charts, there is a spot that says, "Call the ambulance" and "Ambulance arrival." Please document each of these times.
- There is a possibility of MERT tabling during the Southside festival in the spring.
- Operations are working on getting a new parking pass.

Training:

- At conference, Zach learned that other EMS groups have a "skill of the week" where individuals work on a specific skill (backboard, KED, etc.) It will be a skill based off of the NYS exam materials. The 801 will work with the 802 on this during checkout, but it will not be pass/fail or graded.
- Zach will be working on obtaining the new CPR dummies. MERT members will be given first priority for participation in CPR classes.
- NMOPers will be learning about BBP and bleeding control this week at 7PM.
- Sara did a great job during EMT review.
- The EMT practical is this Saturday at 9:30AM. If anybody would like to be a patient please email Birx.

Secretary:

- Marie received copies of certifications from those who sent them to Birx and Adam and updated them all.
- Anybody with outstanding certifications, please email them to Marie.
- Members of the secretary committee should be looking out for an email from Marie. The next project will be creating folders for the new members.

Equipment:

- Please turn off all radios at the end of each shift.
- Joe is working on getting a new set of keys for the bunkroom and UHS office.
- Joe is working on putting his inventory on EMScharts.

PR:

- There is a possibility of MERT tabling during the Southside festival in the spring.
- The MERT banquet will be Thursday, April 18th or Friday, April 19th.
- A possible 803 preceptor program would make the 803 more comfortable within the organization. It would be great PR for MERT because it would get 803s more involved and therefore boost morale. The program would possibly start with the Fall NMOP class and be run similarly to the 802 preceptor program.
- Blood Pressure screening programs would help MERT reach out to the campus community.
- SUBS is hosting an event on Monday, March 18 regarding stem cell research. They are wondering if we would like to cosponsor.
- There will be a mandatory NMOP bonding dinner before the end of the program.

Webmaster/Scheduler:

- The new website design is being worked on.
- Sometime soon 803s will be in charge of recording times on calls.

QA/QI:

- 801s will be receiving an email from Greta about charting.
